

Behaviours, practices, and actions for those involved in demographic data practice to **stop**

					
<p>Creating and contributing to ambiguity or confusion around the purpose of demographic data collection</p>	<p>Choosing approaches (including categories and methods) that exacerbate stereotypes and reinforce deficit narratives</p>	<p>Choosing checklist or tokenistic approaches</p>	<p>Invoking negative feelings and emotions such as apathy, irrelevance, boredom, fear, stress, and exasperation</p>	<p>Prioritising the needs of funders or marketing / advertising above the needs of young people</p>	<p>Creating multiple barriers to engagement and access (including collection tools, language, and age suitability)</p>

Behaviours, practices, and actions for those involved in demographic data practice to **start**

		
<p>Protect sufficient time for the process e.g. to enable reflection, for trust and relationships to be built, for conversations about identity</p>	<p>Co-create approaches with young people that truly represent, as much as possible, how young people identify, which may include 'fluid' and/or be complex in other ways</p>	<p>Build our understanding of what constitutes data 'accuracy' from the perspective of different stakeholders and/or different uses for demographic data</p>

As part of this, we should develop:			
			
<p>Support, training, and resources for practitioners doing demographic data collection</p>	<p>Clear, brief, and specific guidance on why data is being collected and how it will be used</p>	<p>Consistent language to be used across the sector</p>	<p>Nuanced, tailored approaches for specific data categories (e.g. sexuality, ethnicity, etc.)</p>

Behaviours, practices, and actions for those involved in demographic data practice to prioritise

					
<p>Ongoing conversations and co-creation with young people, so that they can influence change on issues that directly affect them</p>	<p>Respecting the extent to which young people do or do not want to be involved, given that some expressed apathy or disconnection</p>	<p>Supporting under-represented or under-served communities</p>	<p>Improving practice and provision (over simply 'proving' that something is happening)</p>	<p>Considering the multiple impacts that demographic data practices can have on young people's identity and/or wellbeing</p>	<p>Addressing tensions between the requests of funders and the interests and needs of young people</p>
